

CORONA VIRUS / COVID-19

What we are doing here at Wilson Farm:

Wilson Farm has always used sanitizing wipes that are specific to cold and flu protection for surfaces (black label) and hands (blue label). We have increased their use and availability throughout the stand. We currently have 19 placed at convenient locations. We have added disinfectant spray that kills 99% of bacteria at all of our checkout registers. We have also installed Purel Hand Sanitizing locations for both customer and employee use throughout the stand and at our carriage houses, 9 in total.

Our Human Resources department has produced and distributed an instruction guide for all employees (in both English and Spanish) reiterating correct procedures for hand-washing. Included in the guide are instructions for all employees to monitor their own wellness and to stay home at the first sign of a fever or cold/flu-like symptoms.

Human Resources has also put in place a strict guideline for all department managers instructing that all surfaces throughout the stand be thoroughly washed on an hourly basis, with the cash register/checkout area be cleaned more frequently.

Wilson Farm will continue to monitor all recommendations from the Lexington Board of Health and the Center for Disease Control.
